

Babymoon Lactation Consulting

Breast milk: A gift that only *you* can give
Your Breast milk is like a medicine that only you can give to your baby. Every drop counts!

Why do I need a Lactation Consultant?

Both mother and baby should enjoy the experience of breastfeeding. A well fed baby is always the first objective but it should also be more than just feeding the baby. It should be an enjoyable nurturing relationship in which the mother and baby feel comfortable, relaxed, and nurtured. It is a relationship that reaches deep into the heart and creates a deep bond of love and trust, which nurtures the spirit of the child as well as the child's body. A visit with an experienced board certified Lactation consultant may help make the difference between a frustrating breastfeeding experience and an enjoyable, successful experience.

Kelli Zackary RN, IBCLC, CIMI

Tricare Authorized Provider and Aetna In-Network Provider
6 consultations covered (more if medically necessary)
